And finally, theres player made challenges and maps. Allowing players to make and play their own map and make money doing it! This is the best feature in any game I have ever seen and will for a long time I have been playing Bloons for 3 years now and got excited when I heard a new release we coming out for the franchise. I brought it for my birthday and pretty much completed most of the game in one day ( I had most of the tier three upgrades and one tier four ) my only problem with game is I prefer td5 in most ways ( but I love the new characters though they always impress) the style of td5 was simple and fun whilst the new installation keeps most of that I feel like the style is lost. The towers are great but just need a bit of tweaking and to bring back the engineers and not have them as a sort of side character making most the new special agents. I have no problem with this I just really like the engineer. The game is brilliant and I dont really hate it, its just if it had a bit more development time it would have been perfect. The new towers (2 one buff and damaging character and one crowd control and money) are great I have use the alchemist and Druid a lot its just that one of the best abilities suiting a perfect class is given to the Druid even though it was perfect for the character it was on. The xp system is perfect for type of game it is and can not have a better sense of progression. The new upgrade for the old monkeys are brilliant and fit in well with what they already are. Overall its a great game but I would recommend bloons td5 instead. Im finding myself get more and more annoyed with this game, as a game its everything you could ask for it has amazing graphics and gameplay and is fun to play, all the new towers and powers make for a lot of stuff to discover and try. It is easily one of the best game to come out of the franchise yet and I believe it will continue to be a fan favourite for years to come. However and this is where the blame lies solely with the developers, you have done an incredible job and I dont want to seem as though I am being negative or putting down your hard work, but why has this game been released with so little content ? I understand why people are annoyed about not having multiplayer already. But all in all the premise for this game is fantastic and I am looking forward to the future updates and releases for this game. How to run Epic Games on your Android Phone How to run Epic Games on your iPhone (EU Only) THIS gAmE IS tOO HaRd lol jk I love this game. I have every hero right now and find the game fun every day, I log in almost every day to get the daily chest and do the daily challenge, its soo fun. I even recently got my first hero skin, but aside from that you should definitely download this game, sure there is a price, but there are literally no ads, not one in sight! Pretty cheap too, there are in app purchases, but theyre not required, so people writing that this game is pay to win are just being dramatic, lots of things are unlocked with monkey money, something you get for beating maps for the first time on a certain difficulty, the higher the difficulty, the higher the money you, you still get monkey money for say beating a map on easy standard time but not as much. I got every hero by grinding to get monkey money, the knowledge points are cool too, they unlock nice features like a free dart monkey and magic lives that regenerate every round when you dont lose any lives. All in all this game is great, you should totally download and as you can tell this is no bot review, almost no cons to the game. This game is also still getting updates, so dont worry about the game getting stale, just wait a bit or play the challenges in challenge browser, there is a LOT you can do. 163 Mobile gamers rejoice! Epic Free Mobile Gaming Push: A Look at Bloons TD 6 GiveawayTime.news Editor: Welcome, John, thank you for joining us today. Epic Games has been making waves in the mobile gaming world by offering free games through their Epic Games Store Mobile app. With Bloons TD 6 recently free, can you elaborate on the significance of this move for both players and the industry?John, Mobile gaming Expert: Its a pleasure to be here. Epics strategy to offer popular titles like Bloons TD 6 for free is a smart move on several levels. Firstly,it significantly widens the reach of these games. Price is frequently enough a barrier for mobile gamers, especially with the abundance of free-to-play titles. Offering a well-established, quality game for free incentivizes players to try it out, potentially leading to greater engagement and even in-app purchases for those who enjoy the experience.Time.news Editor: This certainly makes Bloons TD 6 more accessible. However, we see that the offer is limited to European Union users for iOS. Is this a strategic decision?John: thats right. It does seem like a strategic limitation. Epic Games may be testing the waters with their mobile offerings in a specific region before expanding to a wider audience. Or it could be due to app store policies or distribution agreements that vary globally. Time.news Editor: What are some implications for developers outside of these types of free giveaways?John: This trend emphasizes that mobile gamers crave value for their time and money. Developers need to focus on delivering high-quality, engaging gameplay that keeps players hooked. Whether its through free-to-play models with strategic monetization or introducing limited-time free offers, developers need to find creative ways to attract and retain players in this increasingly competitive market.Time.news Editor: For our readers interested in claiming this free offer, can you give them a rapid rundown on how to do so?John: Absolutely. The Epic Games Store Mobile app site provides straightforward instructions for both Android and iOS users. Theyll need to download the app, visit the Bloons TD 6 page, and follow the platform-specific download links. Time.news Editor: Thank you, John, for your insightful commentary on this exciting growth in the mobile gaming world. The very-excellent tower defense game, Bloons TD 6 normally \$5 on mobile is now available for free on iOS and Android for a limited time. Even if tower defense games arent your scene, this one is going to suck you in with its combination of cutesy, monkey-themed gameplay and a decent difficulty curve as you get better at poppin those horrible balloons.Or, as Lifehackers senior technology editor David Murphy put it, I wasted way too much of my summer climbing the ranks of the monkey army last year. There are no caveats or hoops to jump through with this one. Open the games store page on the Apple App Store or Google Play and tap install. Its free, but theres no word on how long ill be free so buy it now, and you can always decide to install or play it later.If you havent played a tower defense-style game before, Bloons TD 6 is a strategy game that puts you in control of a cast of cartoony monkey characters that act as defensive units, popping waves of balloons that increase in number and difficulty. Each stage features different pathways and types of balloon enemies, and players must use their limited resources wisely to create the best possible defensive formations possibleLike many contemporary games, Bloons TD 6 features in-app purchases, most of which are cosmetic items like skins and characters. That said, its completely playable without having to spend any money on it, since everything can be unlocked just by playing (and progression is quick). It should only take you a few stages of wrecking balloonny lives to accrue a solid chunk of XP to spend on upgrades and skins, and then youll be hooked. Forever.
